

# Axcess™ 2000.H

## Heated, Self-Serve Order Pick-Up Station

Two-sided design for fast order loading and pick-up

### Cabinet

Stainless steel inner and outer body

Holding temperature:  
130° F/54° C to 170° F /77° C

Convection heat

Insulated for temperature stability and energy efficiency

Illuminated compartments for better visibility

Smooth interior covered corners for easier cleaning

LED indicator lights on either side of back doors to aid in compartment loading

Power cord cable management hooks on the back electrical panel

### Front Doors

Seven electronically controlled compartment doors open and close automatically

Break beam safety feature on either side of doors to prevent closure during customer interaction with the compartments

Each compartment door has a tempered glass window

Side lights indicate compartment opening

### Wire Rack Insert

Seven stainless steel wire rack inserts

Racks are easily removable for cleaning

### Customer Visual Display (CVD)

18" display located at the top front side of the unit

Displays compartment numbers and the names of customers whose orders are currently in the station

### Customer User Interface (CUI)

7" touchscreen and QR code reader provide accessible accommodation

Customers can either scan their pick-up code or enter the numeric code using the onscreen keypad to collect their order from the station

**Employee User Interface**

7" touchscreen located on the back of the unit  
Barcode reader mounted below the touchscreen  
Touchscreen and reader provide accessible accomodation
